# Contrôle angiographique J10

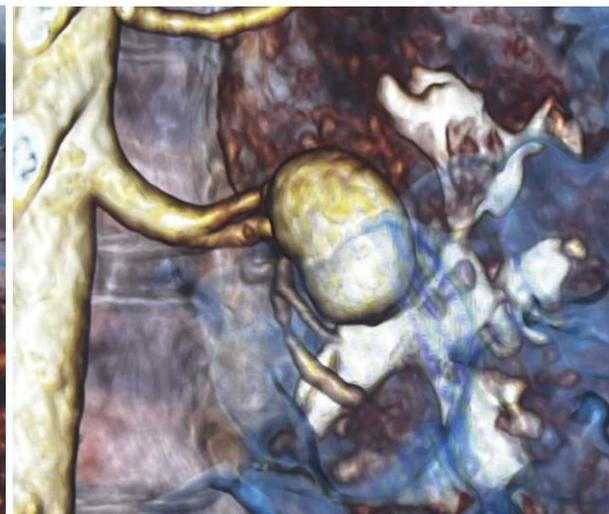

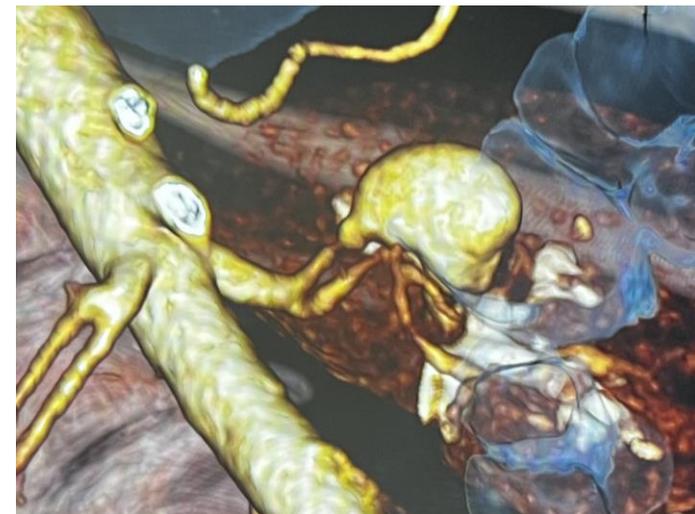

- Sevré d'amines
- FEVg 45%
- Neuro OK
- DFG normalisé

# Utilité IVUS

- Diagnostic
  - Sévérité de lésion IVA
  - Vulnérabilité lésion (thrombus)
- Thérapeutique
  - Pré ATC : diamètres, longueurs ...
  - Post ATC : apposition, expansion, lésion résiduelle, dissection ...
- Low contrast PCI

Made In Horos

# Contrôle IVUS post ATP

# Conclusion IVUS

- Aide diagnostique
  - Sévérité, composition, vulnérabilité, quantification calcifications
  - Ambiguïté anatomique
- Aide thérapeutique
  - Pre-PCI : diamètre, longueur, landing zone...
  - Post-PCI : expansion, apposition, dissection de bord
- Low contrast PCI

**ESC 2024 IA** : imagerie endocoronaire - angioplastie des lésions complexes (TCG, bifurcations, lésion longue ...)
